Significant, state-of-the-art work, methodologies, practices and plans are presented by researchers, technology developers and industry leaders. Indicators of this objective measure deviations of the human or environmental condition from sustainability, but to sustain requires that no appreciable deviation has occurred. Viewed from this perspective, sustainability must be redefined and a new set of metrics must be identified to guide actions that avoid losses.

Sustainability is a vital issue for the long-term, healthy development of the world. Buy Softcover. Johnson J, Canning J, Kaneko popularity et al.
