In its simplest form, a project will consist of a single sequence of activities that absolutely has to happen within a certain timeframe. Resource constraints will affect the true critical path calculation as the longest chain of activities that will determine the shortest period of time may be affected by such constraints.

If you work on a team, you may split the project work between team members. What Here, in each circle the letter before the comma identifies the job and the number after the comma indicates the job time. What is a PMO? Thus the contractor must watch for possible shifting of the critical path as he affects changes in critical jobs.

The critical path is shown in red in our example given. You could have it ready for manager.
