This recommendation is conditional based on very low quality of supporting evidence and known risks of glucocorticoid treatment in the pediatric population. Clinical Radiology. Allthechaptershaveaclinicalfocusandpracticalcaseexamplesareusedto A strong recommendation Ankylosing Spondylitis (Oxford American Rheumatology Library) that the Voting Panel was confident that the desirable effects of following the recommendation outweigh the undesirable effects or vice versa so the course of action would apply to all or almost all patients, and only a small proportion would not want to follow the recommendation. In children and adolescents with JIA and enthesitis who have or are at risk for functional limitations, using PT is conditionally recommended This recommendation was conditional based on very low quality of evidence and Voting Panel experience. In each case, very limited data were identified, and future research in these modalities will be helpful in identifying patients most likely to benefit from these interventions and which modalities have most effectiveness for particular clinical scenarios. TheidentificationofvalidandpracticaldiseaseactivitymeasuresinJIA Modern Musculoskeletal Physiotherapy 4th Edition.
